LOCATION	CUBIC YARDS PLACE MEASUREMENT		
STATION TO STATION	BEFORE DREDGING	AFTER DREDGING	TOTAL
2+00 TO 33+50	46 000	11 600	57 600

NOTES

PROJECT DIMENSIONS: A channel 6 feet deep and 60 feet wide. SOUNDINGS are in feet referred to NOS Mean Low Water and were taken on dates shown.

MEAN LOW WATER (MLW) was determined by interpolating between MEAN-HIGH-DIFFERENTIALS of Pig Point, Nansmond River Entrance and Old Nix Clubhouse Site, Nansmond River, based on National Ocean Service (NOS) tide observations (see diagram for values).

MEAN RANGE OF TIDE: 2.8 feet at Pig Point and 3.0 feet at Old Nix Clubhouse based on NOS observations.

COORDINATES are in feet referred to Virginia State Grid (south zone) and are based on North American Datum of 1927 (NAD27).

SHORELINE FEATURES are approximate and were developed from aerial photography flown during May 1988.

OYSTER GROUND limits were provided by Virginia Marine Resources Commission.

The information depicted represents the results of surveys made on the dates indicated and can only be considered as indicating the general conditions existing at that time.
